

# NUCLEAR SEMINAR SERIES

---

**Prof. Ani Aprahamian**

**University of Notre Dame &**

**A.Alikhanyan National Laboratory**

**Monday, November 4**

**4:00 pm - Rm 184 NSH**

***Where in the world is Armenia?***

***What is Ani doing there?***

Aprahamian has taken on the directorship of the National Laboratory of Armenia simultaneously to her job here at the Nuclear Science Laboratory of the University of Notre Dame. The plan was to kick off low energy nuclear science and its applications. The connection to Armenia came through the International Committee of Experts that she served on ten years ago. She will describe the history of the laboratory, the present situation, and future plans. Focus will be on enabling change, the achievements, and challenges.
